

# LANCEA LAND SPEEDER SQUADRON 40 POINTS

## Fast Attack

The Lancea Land Speeder is a fast and agile recon vehicle, based on the anti-gravitic technology recovered by the techno-archaeologist Arkhan Land. It is utilised exclusively by the Legiones Astartes, as unmodified humans proved to have to slow reflexes to reliably steer this fickle craft. Its armament is relatively heavy for a vehicle of its size and mass, however this come at a great cost in survivability. Its occupants rely solely on their own personal armour for protection, the speeder itself depending on its speed and manoeuvrability to avoid destruction on the battlefield.

v1.00

	BS	Armour			HP
		Front	Side	Rear	
Lancea Land Speeder	4	10	10	10	2
